Abstract

【Problems】 A player's operation is simplified to the utmost, and player's will is sufficiently confirmed and player's safety is secured.

【Means for Solving Problems】

A robbery damage of the electronic money storage medium (EDY) is prevented because the electronic money terminal (EDYT1) reads the electronic money storage medium (EDY) when the electronic money storage medium (EDY) is deeply inserted into the insert space 601.

The electronic money terminal (EDYT1) is provided with a credit button (602) which is pushed before the game is starts the game machine. Therefore, the player's will can be confirmed.
